Summary

Final-year Computer Science student specializing in Full-Stack Web Development. Strong foundation in frontend technologies and growing expertise in scalable backend systems. Experienced in building real-time network tools, music-based social platforms, and managing robust e-commerce infrastructure with effective communication and problem-solving skills.

Skills

Programming Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, SQL, HTML5, CSS3

Frontend Architecture: React.js, Next.js (App Router), Tailwind CSS, Bootstrap, React Native

Backend & Real-Time: Node.js, Express.js, NestJS, RESTful APIs, WebSockets (Socket.io), Firebase

Databases & DevOps: PostgreSQL, MongoDB, MySQL, Neon DB, Git, GitHub, Vercel, Docker, Shopify

Work Experience

Argmac | *Developer Intern*

May 2026 – Present

Fullstack Development (Shopify, Technical SEO, Site Architecture)

- Maintaining and resolving complex issues on the company's Shopify website to ensure 99.9% optimal functionality.
- Executing technical SEO strategies to enhance site architecture, resulting in significantly improved search engine visibility.
- Optimizing user interface elements to streamline the customer journey, reducing bounce rates and improving site load speed.

Indian Oil Corporation Limited | *Summer Intern*

June 2025 – July 2025

Fullstack Developer (React.js, TypeScript, MySQL, Bootstrap)

- Contributed to a centralized graphical user interface (GUI) that enabled enterprise network administrators to manage distributed devices.
- Built functional, highly responsive interfaces using React.js and TypeScript to automate and improve daily monitoring workflows.
- Managed structured relational data using MySQL, ensuring efficient performance querying of complex network elements.

Projects

Savora (Expense Manager) | [Website](#)

Jan 2026 – Present

Fullstack Developer (Next.js 15, NestJS, PostgreSQL, Neon DB, Vercel, Render)

- Architected a serverless backend with NestJS and Neon PostgreSQL; achieved sub-200ms dashboard load times via edge caching.
- Implemented secure JWT authentication, session handling, and robust environment variable management across deployment environments.
- Built real-time expense tracking with category breakdowns and integrated Recharts to render dynamic, interactive visual analytics.

Zenra (Music-Based Connection App) | [Website](#)

Jan 2025 – Dec 2025

Fullstack Developer (React Native, Node.js, MongoDB, Socket.io, Firebase)

- Grew platform to 500+ active users; engineered a cross-platform mobile app that reduced initial load times by 25% via code splitting.
- Developed a low-latency, real-time matchmaking backend supporting 500+ concurrent users with 99.5% uptime using WebSockets.

Network Management System | *Full-Stack Tool*

July 2025 – Aug 2025

Fullstack Developer (React.js, TypeScript, MySQL, Node.js)

- Developed a robust centralized GUI to monitor the performance, health, and configuration constraints of critical network hardware.
- Designed reusable React components to ingest and display real-time data analytics, system logs, and hardware health metrics.

Olympiad Management | *MERN Stack*

Mar 2025 – May 2025

Fullstack Developer (React.js, Node.js, Express, MongoDB)

- Constructed a secure backend server using Node.js and Express.js to efficiently manage high-volume registration data flows.
- Built a scalable component-based UI in React.js and utilized MongoDB schemas to track thousands of student records and exam metrics.

Education

Dronacharya College of Engineering

Graduating 2026

B.Tech in Computer Science (IoT) | **CGPA: 8.2/10**

Certificates & Achievements

Full Stack Web Development - IIT Roorkee (iHUB Divyasampark)

2025

IBM Certifications: Generative AI, Frontend Dev, Intro to SW Dev

2025

HackerRank 5 Star Problem Solving | Top 10 Finalist at KRMU Hackathon

2024 – 2025
